EXEMPLAR

THE NEXT EVOLUTION IN EFFICIENCY

CSZNet + *EXEMPLAR*

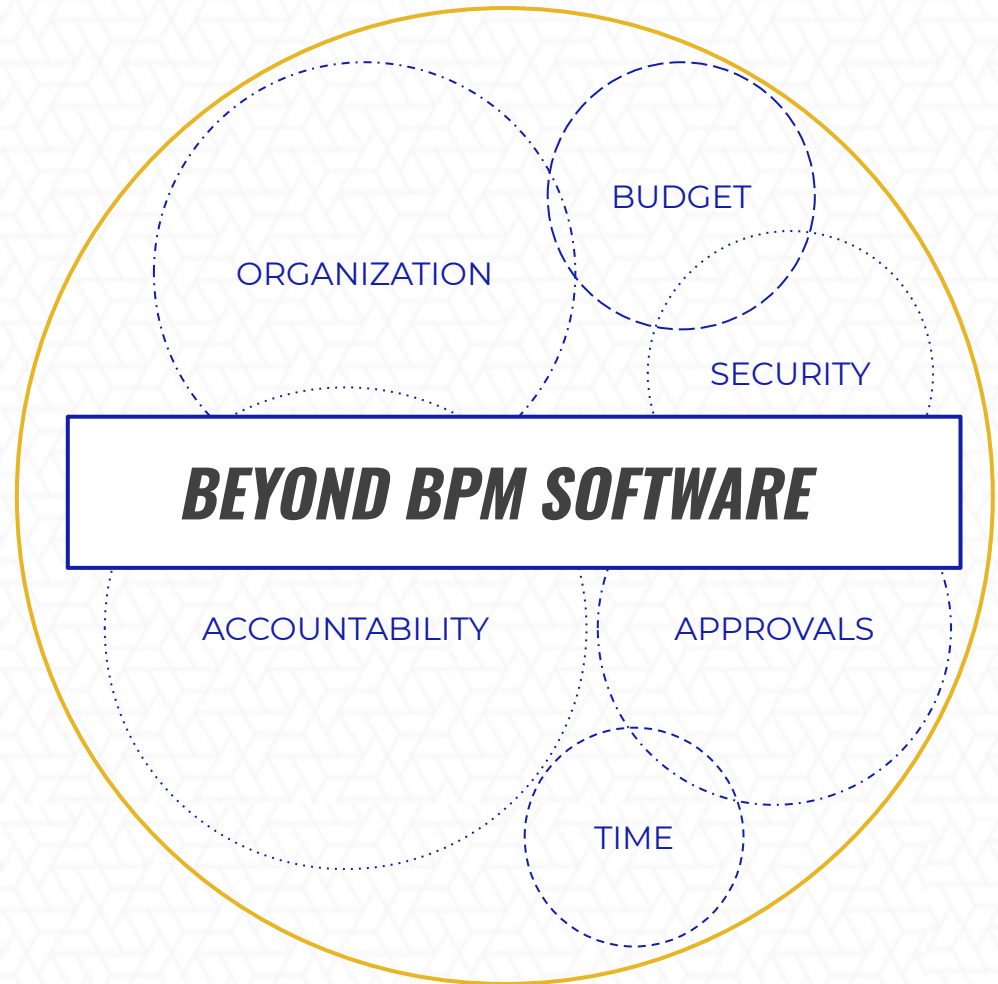

CSZNet believes in using technology to empower organizations to become scalable, agile, and comprehensive. That's why we created *EXEMPLAR*.

EXEMPLAR was born from our time working with complex systems as a SBA 8(a) Certified SDB while delivering solutions to the IRS, DoJ, USDA, and countless other federal, state, and commercial clients. From here we realized the necessity for organizations to embrace the next evolution in efficiency.

EXEMPLAR

Exemplar is an A.I. powered platform that drives efficiency. The platform forges connections between people and recurring processes including:

- Ensuring licensure of teachers and staff for administration and education organizations
- Checking insurance and paperwork for healthcare entities
- Approvals and permission of expenses, sales, and budgets across internal staff and departments

USING *EXEMPLAR*

FIRST OF ITS KIND

This process management platform runs on an A.I. engine that assigns tasks and delivers outcomes and accountability.

AUTOMATED

Compresses complex workflows, approval processes, and cycles down to cut out errors, repetition, and time draining tasks.

INTELLIGENT

Determines and recommends next actions and approvals, ensuring efficiency, accountability, and quality.

INSTANT

Gathers, verified and authenticated data and credentials with continuous monitoring. Provides real-time status on the system.

CUSTOMIZABLE

Easily customizable to any needs, rules, and legal requirements for all governing bodies or organizations.

SECURE

Data is safe with government grade security. Additionally, the system delivers transparency, audit trails, and detailed reports.

MONTHS TO DAYS

Some of our clients have reduced operations and processes that took several months down to **one week**, sometimes even a single day.

EXEMPLAR COMPARED

EXEMPLAR

- Artificial Intelligence (A.I.)
- Information Management
- Reporting and Analytics
- Third Party Integrations
- User Portal
- Adaptive Implementation
- Security and Monitoring

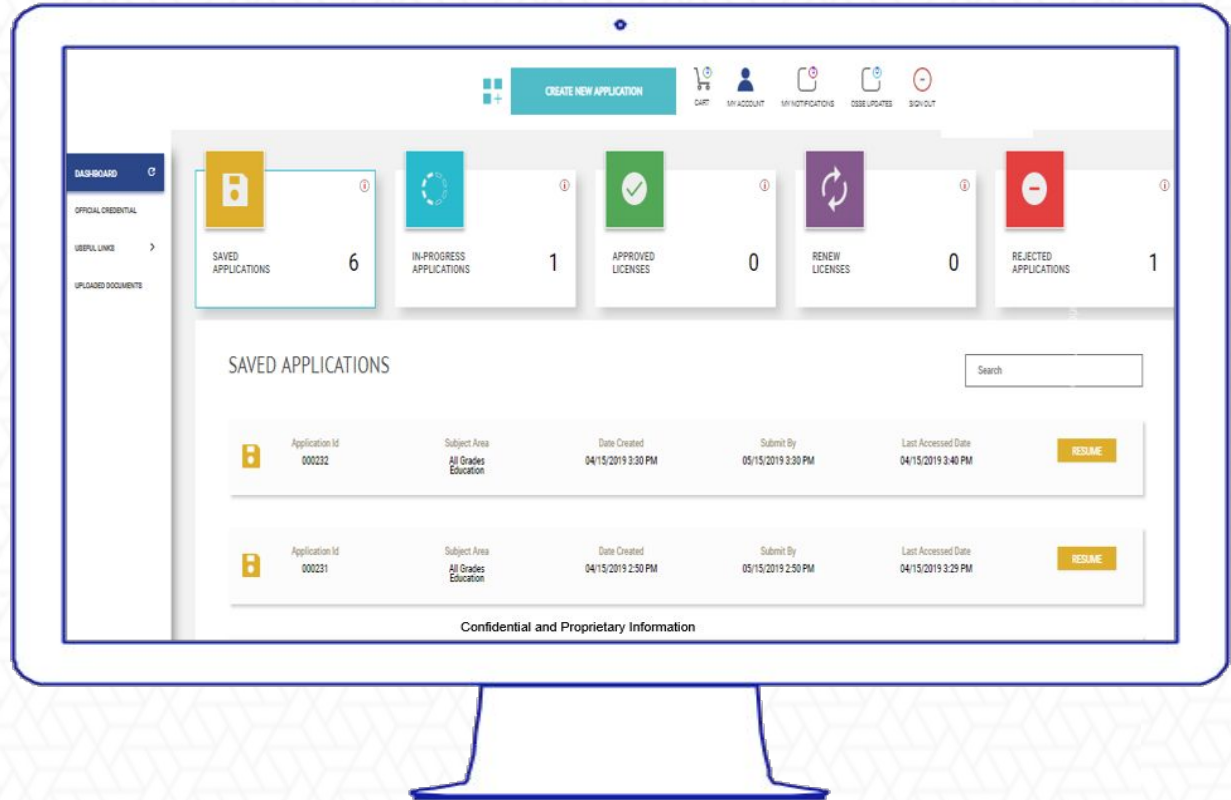

TRADITIONAL BPM SOFTWARE

- Artificial Intelligence (A.I.)
- Information Management
- Reporting and Analytics
- Third Party Integrations
- User Portal
- Adaptive Implementation
- Security and Monitoring

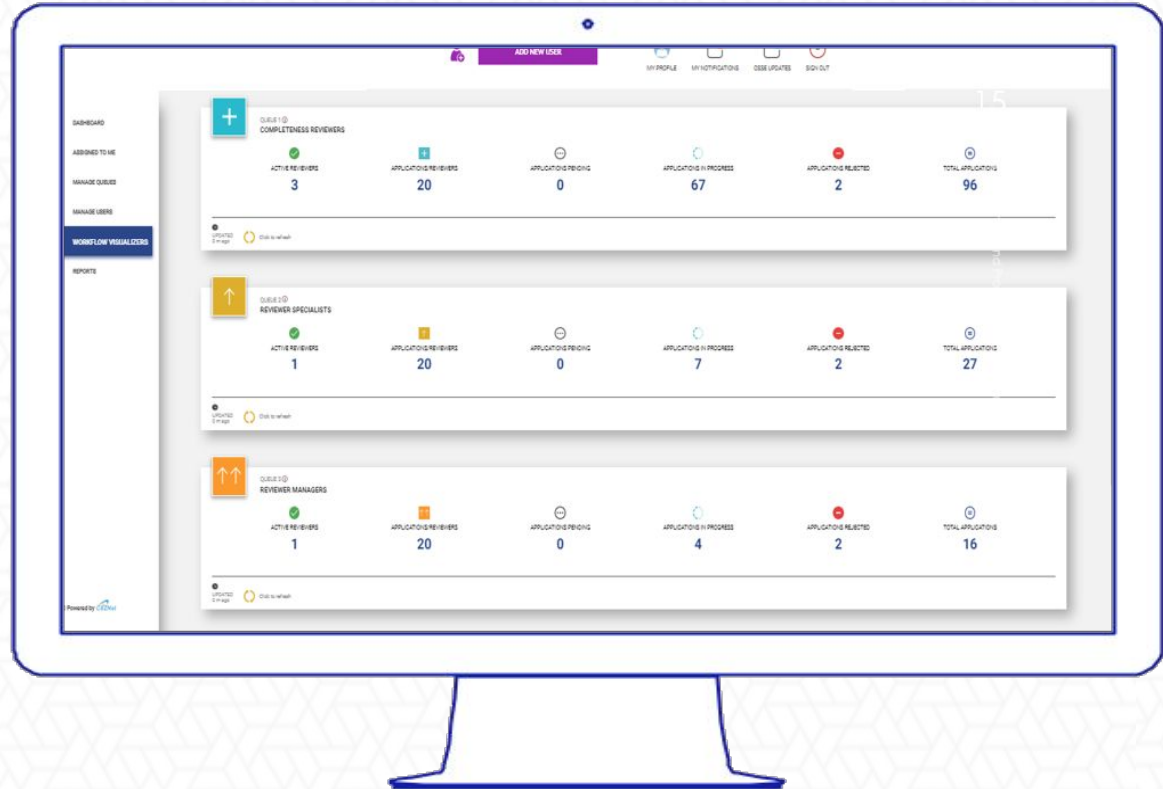

APPLICANTS

- ★ Track and Save Progress
- ★ Monitor Status
- ★ Simple Data Input

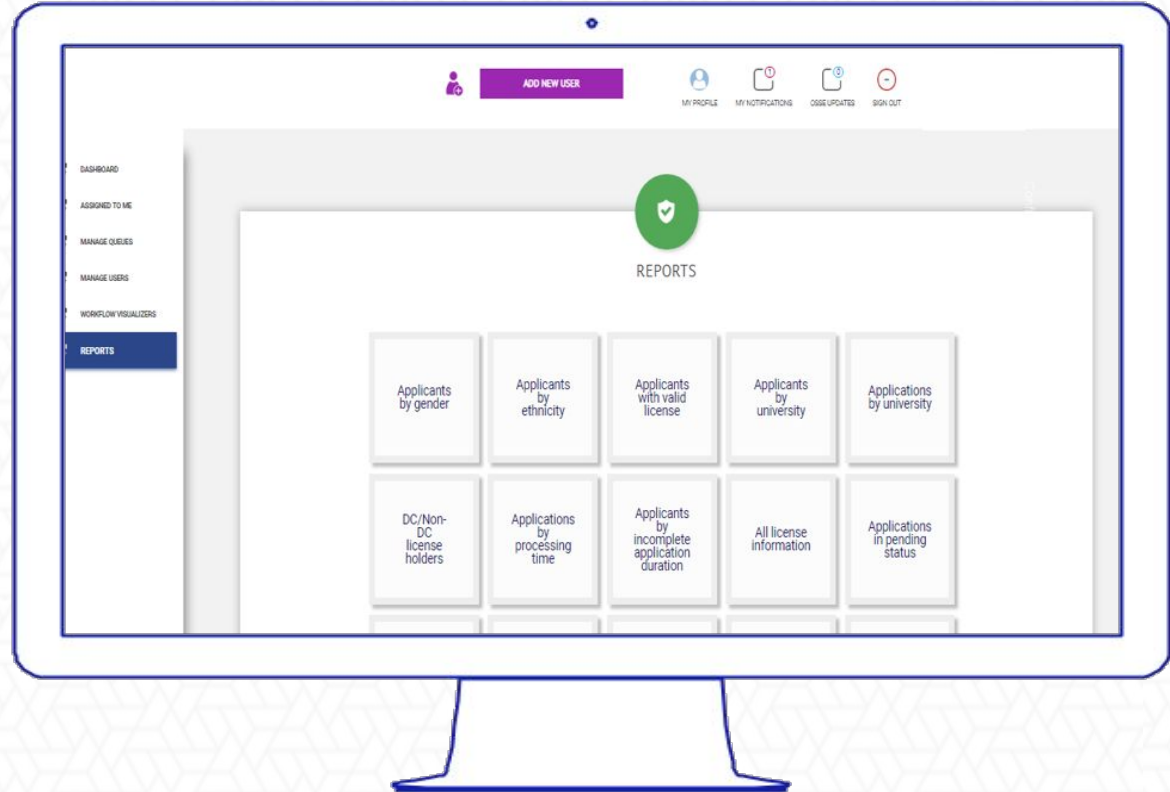

STAFF AND SUPERVISORS

- ★ Track Workflow
